Windows-Based Host Name and Operating System Look-Up

To assist the Information Security Office (ISO) in identifying what your system’s Host Name is, please follow the instructions provided below for a Windows Based System:

- Click on the “START” button (typically located on the lower tool bar)

  ![Start Button](image.png)

- Next right-click (see 1 below) on “Computer” and select (see 2 below) “Properties”

  ![Computer Properties](image.png)
- **Windows 7**: Annotate Computer Name (1-Host Name) and Operating System (2):

![Windows 7 System Properties](image1)

- **Windows XP**: Main Pop-up Provides System Properties (2-OS version); Computer Name Tab Provides Computer Name (1-Host Name):
