Instructions for Running Microsoft Forefront Client Security

If you are running the MSForefront Client Security, the following icon is displayed in the lower right-side system tray:

- Right-click on the icon and select “Open”.

- When the Forefront Client Security main window opens, click on the white arrow to the right of the Help icon and choose “Check for Updates” to make sure you have the most up-to-date virus definitions before you run the scan:

- After you have performed the update, click on the white arrow to the right of the “Scan” button and choose “Full Scan” to start the scan.

Note that this process may take approximately 45 minutes or more depending on the size of the files on your computer.

Once the scan finishes, if you notice that an icon in your tray turns “Red” with an “X” (as shown below) then please double-click on this icon to display the page shown below. Lastly, please click on the “Smart Clean” button to remove the virus. If you do not see the “Red X” icon in your system tray no further action is required.
